## Discovering Value Through Exploration

## SHAREHOLDER UPDATE

07 September 2023

Dear Shareholder,

It is with great sadness that Green Glen Minerals Limited announces that David Hall, Executive Chairman, passed away suddenly on 26th August 2023. David, a Director of the Company and founder of the original parent company Erris Resources, will be sorely missed as a colleague and friend to the team, and by those in the wider mining community who were privileged to work with him. Aiden Lavelle, CEO, will assume the responsibilities for the Company and will work with significant shareholders to identify and appoint a new Director to the Company.

The company has been run on a voluntary basis for the past year as the complex legal situation around mineral title was being resolved. We hope to resolve the remaining issues in the short term and achieve David's ambition of testing a potential new gold discovery in Scotland and returning value for shareholders.

Aiden Lavelle Director of Green Glen Minerals said, "First and foremost, our thoughts are with David's family at this difficult time, and we extend to them our deepest condolences and sympathies. David was an inspiration to all that knew him, his drive and enthusiasm for exploration was infectious and he was a superb team and company builder. His energy translated into success with multiple natural resource companies and a successful discovery track record in both major corporations and junior exploration and development companies. David brought together and supported many young geologists in his career and was deeply respected as a colleague, mentor and friend by those whom he worked with. David was a pleasure to work with and he will be sorely missed not only by his immediate family, friends and colleagues but the mining industry as a whole."

## Aiden Lavelle, CEO
